STUDENT ACADEMIC OUTPUT PLEDGE

SEMESTER 2 2020/2021

I hereby confirm and pledge that all answers that I have given are my own and that I have not copied in part or whole or otherwise plagiarised the work of other students and/or persons through the act of collusion or plagiarism.

I understand and acknowledge that any violation of this pledge amounts to a violation of the Universiti Tun Hussein Onn Malaysia (UTHM) Final Examination Rules and the UTHM (Student Disciplinary) Regulations 2009, and will have implications on my studies and results if I am found guilty.

SECTION A

Choose the best answer for these questions.

Q1 Citations are important

- A to describe the outcome of a more substantial part of the research
- B to let the readers get the right information from the journals you have read
- C to demonstrate the authors' understanding and the ability to convey information
- ☒ D to show the readers where the information in your paper was originally published

(1 mark)

Q2 The benefits of using citation are

- I to avoid charges of plagiarism
- II to find the source of the author's facts or ideas
- III to present ideas and information in your own words
- IV to provide hard evidence or expert witnesses to support your argument

- A I, II and III
- ☒ B I, II and IV
- C II, III and IV
- D All of the above

(1 mark)

Q3 Which is the correct format of an APA in-text citation for multiple authors?

- A (Warner, et al., 2020)
- B (Warner & Debra, et al., 2020)
- ☒ C (Warner, Debra, Abdullah & Lee, 2020)
- D Warner, Debra, Abdullah, Lee, et al. (2020)

(1 mark)

Q4 How do you cite the following reference in your writing?

Dhawan, M., & Anwar, K. (2020). *Online learning amid the COVID-19 pandemic: Students' perspectives. Online Learning*, 2(1), 45-51.

- A According to Dhawan (2020),
- ☒ B According to Dhawan & Anwar (2020),
- C According to Dhawan, M. & Anwar, K. (2020),
- D According to Dhawan & Anwar, in an article published in 2020,

Q5 Which one of the statements is the **BEST** paraphrase of the except below?

Because of the complexity of homelessness from a social policy and service delivery perspective, there are a wide range of views on what constitutes homelessness. Definitions of homelessness range from limited objective measures which conflate homelessness with rooflessness to more subjective definitions founded on culturally and historically determined ideas of 'home'.

- A Homelessness can be defined in many ways from different opinions of social policy and service delivery. Thus the meaning of homelessness is basically being roofless and it is determined from cultural and historical ideas of 'home'.
- B Homelessness is complicated from both policy-making and service delivery points of view. Thus, the characterisations of homelessness encompass both narrow objective views as being roofless, and more personal definitions based on cultural and historical understandings of 'home'.
- ☒ C A multi-faceted concept, homelessness can be defined in a variety of ways, most simply as the basic lack of shelter. However, our understanding of what constitutes a 'home' is also informed by our culture and history. This complexity impacts the development of effective policy and services to address homelessness.
- D There are a wide range of views on what constitutes homelessness due to the complexity of social policy and service delivery perspective. Meanings for homelessness varies from limited measures as being rooflessness to more subjective definitions originated from the culturally and historically determined concepts of 'home'.

SECTION B

Q6 Paraphrase the following excerpt.

In a small study from the University of Basel in Switzerland, subjects monitored closest to a full moon experienced less deep sleep, produced less melatonin, and took five minutes longer to fall asleep than those monitored during other times of the month. Sleep researcher Marie Dumont, who wasn't involved in the study, suggests that the full moon could indirectly affect the internal body clock by increasing volunteers' exposure to light in the evening.

(Source: Dreber, B. (2020, March). 10 Spooky Facts You Never Knew About the Moon. *Reader's*

Subjects observed closest to a full moon reported less deep sleep, made less melatonin, and took five minutes longer to fall asleep than those watched. A tiny research from the University of Basel in Switzerland found that people observed around a full moon had less deep sleep, generated less melatonin, and needed five minutes longer to fall asleep than those studied at other times of the month. The full moon, according to sleep expert Marie Dumont, might indirectly impact the internal body clock by increasing volunteers' exposure to light in the evening.

Q7 Read the following abstract and answer the questions that follow.

General anxiety disorder is one of the most common anxiety disorders, especially in college students, because it usually develops in early adolescence or young adulthood. The present study aimed to investigate the prevalence of social anxiety disorder and its associated factors in students of educational science for academic year 2016-2017. This study was a cross-sectional and descriptive study. One hundred and ninety-eight (107 females and 91 males) students in College of Education, University of Garmian were randomly selected. A questionnaire in two parts (demographic and Social Phobia Inventory) was used to collect data. Data were analyzed by descriptive and analytic statistics in SPSS-22. The percentage of participation in the study was 79.2%. Mean and standard deviation of students' age were 20.53 year and 1.86. The majority of the students were female (54%). Findings showed that prevalence of social anxiety disorder was more than 80%. Intensity of social phobia was mild in 20.2%, moderate in 41.9%, and severe in 28.3% of participants. Gender was associated with social anxiety disorder ($p < 0.05$); and social anxiety was more prevalent in freshmen and sophomores ($p < 0.05$). It can be concluded from this research that social anxiety is a prevalent disorder in students of College of Education. It is more prevalent in females, freshmen, and sophomores. According to the findings of the research, these students need more protection.

ACCIDENT / INCIDENT REPORT FORM

SECTION I: WITNESS INFORMATION

NAME: MUHAMMAD IZZUL BIN HANIP

HOME ADDRESS:

33 JALAN PUTERA INDAH 2/2, BANDAR PUTERA INDAH. TONGKANG PECHAH, 83010 BATU PAHAT. JOHOR

Telephone Number: (+60) 010-456 9612

Date of Birth: 19/12/1999

SECTION II: ACCIDENT/INCIDENT DATA

No of Injury: 1

DATE of Accident /Incident: 10 March 2021 **TIME of Accident /Incident:** 10.00 AM

Accident /Incident occurred at: LMN Computer Sdn Bhd.

Specific Location of Accident:

Computer Lab at LMN Computer Sdn Bhd.

Briefly explain what happened:

- 1) The 22-year-old technician, Razif bin Hassan who work at IT department in LMN Computer Sdn Bhd. tripped and fell while shifting a new computer from the cupboard to the computer shelf at the computer lab. The technician lifted the computer only by himself at that time
- 2) The technician has some bruises on his right elbow and left knee effect from the tripped.
- 3) During the incident, the screen of the computer cracked and was not able to be switched on. The company had a total loss of RM4000.

What action was taken:

- 1) The technician who was injured was given the first aid by another officer at the company, Nabillskandar who also works at IT department.

How the incident can be avoided in the future:

From the works he needs to be done, the technician should lift the new computer with partner as the computer is quite heavy to be lift alone. Also, the technician should consider equipment such as trolley cart to help him shift the computer easier.
